

Where the Conversion Leaks Are

nomadinternet.com · CRO Recommendations · August 2026

The single most valuable conversion mechanism on this site is the coverage-check funnel, which is being bled by a dead-end /pricing page and a homepage with competing primary CTAs that dilute the visitor's next step. Fixing the /pricing error and consolidating CTAs to a single 'CHECK COVERAGE' action will recover the most revenue.

#	Finding	Severity	Effort	PXL
1	Lab LCP of 46.4 s on mobile Measured in a lab load: the page's main content takes this long to appear on a mid-range phone; most visitors...	Urgent	Medium	5/10
2	Competing primary CTAs Multiple primary CTAs without hierarchy confuse the visitor about which action advances the funnel.	High	Medium	5/10
3	Headline omits unlimited promise The hero headline fails to mention unlimited data, weakening the core value proposition.	High	Low	5/10
4	Lab CLS of 0.73 on mobile Measured in a lab load: the layout jumps while loading, causing mis-taps on the very buttons the funnel...	High	Medium	5/10
5	Lab TBT of 1,140 ms on mobile Measured in a lab load: script work freezes the main thread, so taps and scrolls go dead during load.	High	Medium	5/10
6	Review count and recency missing Social proof lacks review count and recency, weakening credibility.	Medium	Medium	5/10
7	Dead-end pricing page error The /pricing page returns an error, causing a dead end for users seeking pricing information.	Urgent	Medium	4/10
8	Funnel restarts on every page The same qualification form appears on multiple pages, forcing users to re-enter the funnel regardless of...	High	Medium	4/10
9	Multiple forms with identical submit Two forms with the same CONTINUE label create ambiguity about the current step.	Medium	Low	4/10

#	Finding	Severity	Effort	PXL
10	Value claims lack specifics The claim of being fastest lacks concrete speed or comparison figures, leaving the value proposition...	Medium	Medium	3/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
